FIT3155: Lab questions for week 8

Objectives: Concepts from weeks 6-7
---

1. Implement B-tree supporting the following operations:

   - *insert*
   - *delete*
   - *search*

2. If not already completed in previous weeks, finalize your implementations of binomial and Fibonacci heap data structures, each supporting the following operations:

   - *insert*
   - *min*
   - *extract-min*
   - *merge*
   - *decrease-key*
   - *delete*

<div align="center">
